RLS - RAIMONDI LEVELLING SYSTEM

"The perfect system for levelling tiles."

It can be very difficult to properly set large format tiles in a thin set adhesive. Although at the time of installation the tiles can seem perfectly levelled, once the adhesive sets differences in tile levels may become evident.

You can avoid this possibilty by using the Raimondi Levelling System which preserves the perfect levelled finish and saves you time.

The Raimondi Levelling System:

- Is very easy to position and remove
- Caters for a minimum joint width of 1.5mm
- Allows for tile thicknesses of 3mm to 12mm and 12mm to 20mm
